Central Florida, USA | LinkedIn/AlanHernandez

Summary

Web developer focused on building production-ready web experiences. React and Next.js are the techs I enjoy working with most, but I'm comfortable working across different stacks when a project requires it. Experience includes client websites, E2E testing, and contracted ongoing production support.

SKILLS

Languages: TypeScript, HTML5, CSS3, JavaScript (ES6+)

Frontend: React, Angular, Next.js, Tailwind CSS, Material UI

Testing/Tools: Playwright, Git, GitHub, Vercel, Netlify

CMS: WordPress, Gutenberg, WPForms

EXPERIENCE

Diamond Ace Construction - Frontend Developer (Contract) 05/2026–Present Live

Developed and launched a production website for a Central Florida painting company, with continued responsibility for frontend improvements and contracted website support.

- Built a responsive, multi-page application using Next.js, React, TypeScript, and Tailwind CSS, with reusable UI components, interactive navigation, and a guided estimate-request experience.
- Engineered a lead-generation workflow using Netlify Forms, form validation, spam protection, and automated email notifications, verifying successful submissions in production.
- Managed the website through automated E2E testing, accessibility and cross-browser QA, performance optimization, technical SEO, and GitHub-based deployments, supporting the site beyond its initial launch.

Bitarosa (Client Website) – Frontend Developer (Freelance) | *10/2025-02/2026* **|** Live

- Built a responsive WordPress website focused on lead capture, brand consistency, and mobile usability using Astra, Spectra, and WPForms.
- Resolved routing, publishing, and caching issues to ensure reliable website behavior across devices.
- Worked directly with the client to implement feedback, improve navigation and contact forms, and deliver updates based on business needs.

FrontEnd Now — Front-End Web Developer Apprenticeship| *08/2024–08/2025*

Completed a year-long frontend apprenticeship under senior-developer guidance, building applications with React, Next.js, Angular, and TypeScript. Collaborated with instructors and peers on reusable components, debugging, automated testing, and performance improvements.

PROJECTS

Atlas Grooming – E-Commerce Store (2025) | Link

- Built a full-stack e-commerce application using **Next.js (App Router), TypeScript, and Supabase**, featuring dynamic product pages, reusable components, and database-driven product data.
- Developed a shopping cart with **React Context, useReducer, and localStorage persistence**, alongside a checkout flow with shipping details, order summary, and confirmation screen.

Education Analytics Admin Dashboard (Angular + TypeScript) | Live | GitHub

- Built a responsive analytics dashboard using Angular, TypeScript, Signals, and SCSS, featuring interactive KPI metrics, attendance trends, grade distributions, and at-risk student detection.
- Implemented reusable UI components, a collapsible sidebar, and Playwright E2E tests across Chromium and Firefox, with automated test execution through GitHub Actions.

EDUCATION & TRAINING

SkillCrush – Front-End Certificate (2024) - HTML, CSS, JavaScript, React, and Python.

NuCamp – Basic Fundamentals Front-End Developer Certificate (2023) - HTML, CSS, JavaScript and BootStrap

Lyman High School – Longwood, FL (2014) - (Computer Engineer Magnet Program)
